

## Stay Safe: October is National Cyber Security Awareness Month!

Saturday, 02 October 2010

October is National Cyber Security Awareness Month! PhishBucket, proud sponsor of NCSAM for the third year in a row, would like to remind everyone--especially job seekers--to beware of online stranger danger, and to be extra vigilant about protecting your personal information while online.

Some excellent resources to share with your family and friends:

-- Check out PhishBucket's list of clues to look for when researching suspicious online job offers.

-- Listen to PhishBucket founder Tabatha Marshall talk about the pitfalls of bogus job offers with Ric Bratton on This Week in America in October 2009.

-- Browse through a host of videos, documents and other cyber security resources from StaySafeOnline.org.

-- Have a look at some valuable consumer advice from the Anti-Phishing Working Group on how to avoid phishing scams.
